

Active Climate-Controlled Containers for Reliable, Traceable Storage and Transportation of High Value Goods.

Who is CBX?

For more than a decade, CBX (Cold Box Express, Inc.) has been a leading provider of active temperature-controlled solutions. Our products are designed to protect temperature-sensitive freight during ground transportation and storage. CBX products deliver an FDA 21 CFR Part 11-compliant, economical, reliable, and green alternative to traditional CRT refrigerated and frozen transport.

NEW EXPANDED
TEMPERATURE
-35°C*

The ClimateCrate™ FLEX For High Roof Cargo/Sprinter Vans or Cold Chain Storage

ACTIVE REFRIGERATION

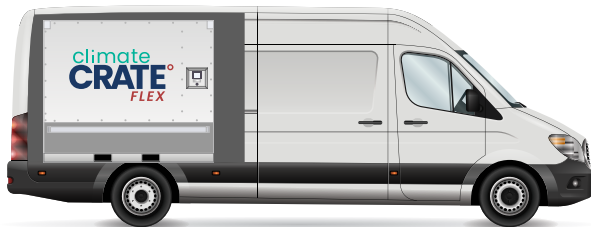

- No need for dry ice or phase-change materials.
- Maintains temperature within +/- 1°C.
- Powered by non-lithium batteries that can be recharged via a standard outlet (115/240 VAC).
- Zero-exhaust emissions container.

PURPOSE BUILT

- Sized to fit pallet shipments with rugged construction.
- Forklift & pallet jack compatible for easy moving.
- Designed for ease of use, minimal training needed.
- Complies with FDA GMP.

PEACE OF MIND

- Validated for pharmaceutical storage and shipment.
- 24/7 monitoring, alerts, & reporting.
- Contract flexibility to fit a variety of needs.
- Heating capability offers Protect From Freeze for shipments.

KEY FEATURES

- Holds one pallet (48" x 40" x 49") with a total interior cargo space of 51" x 41" x 48".
- Expands flexibility of your fleet - converts your high roof vans from dry to refrigerated transport as needed.
- Reduced exterior size allows for easy loading/unloading.
- Utilizes approximately 2/3 of available cargo space so dry and refrigerated loads can be consolidated.
- Optional DC to DC power connection enhances hold times.
- Optional racking system provides shelf storage for increased flexibility.

*Minimum temperature for shipping may vary depending on ambient conditions and necessary battery life.
